How to use the Area project.

On this page, you will be able to Sign In, if you have an account:

Click here if you need to create a new account.
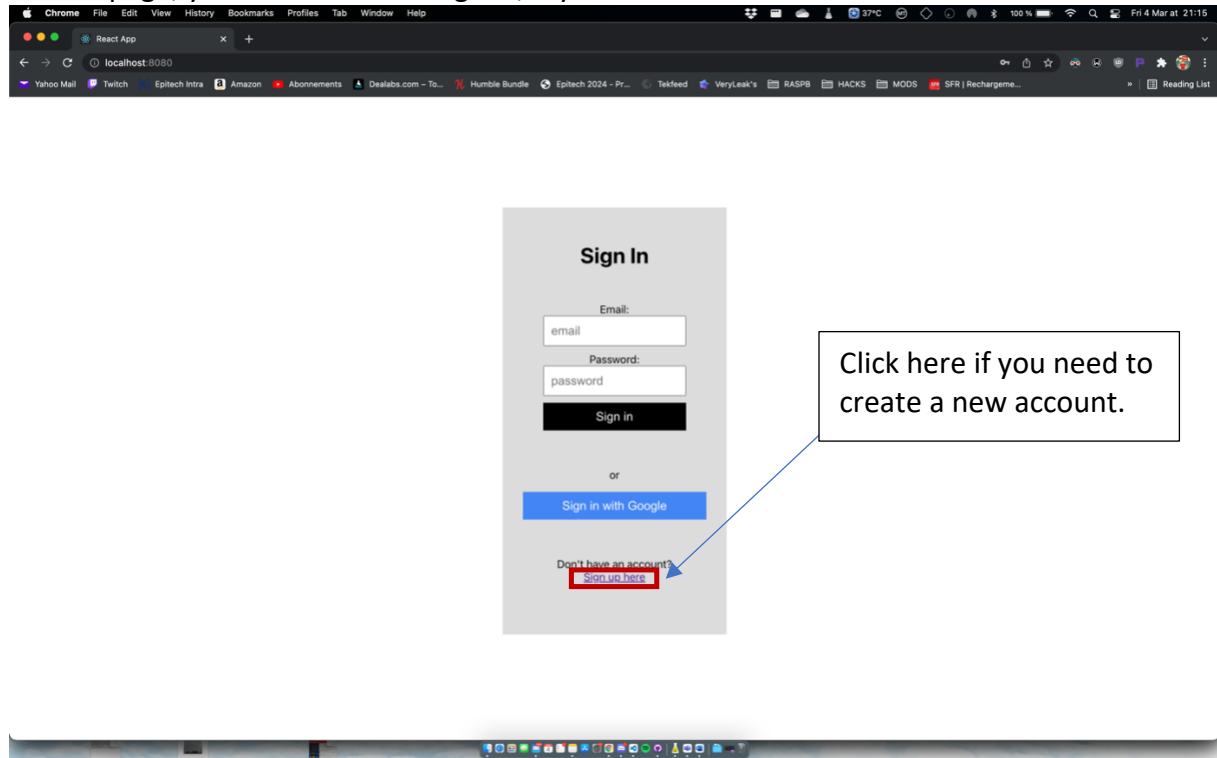

You'll arrive on this page, you can enter your information, don't forget them you will need them later to Log In:

You can enter your username.

You can enter your email address to create your account.

You will need to enter your password. It needs to be at least 6 characters.

Then you click the button "Sign up" to create your account.

You can choose to connect with Google if you want:

You can click on this button to create an account with Google.

You will have a new window open on your screen. You can choose to login with your Google account:
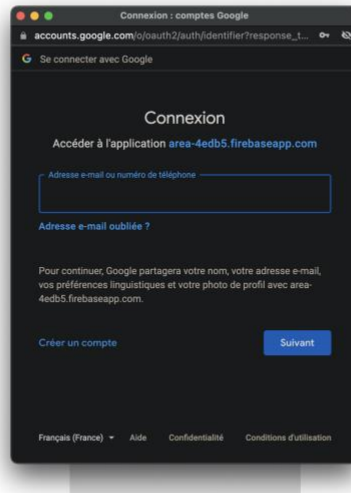

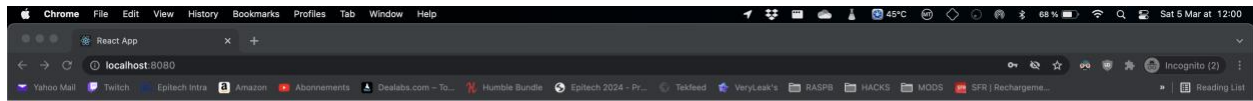

You will arrive on this page:
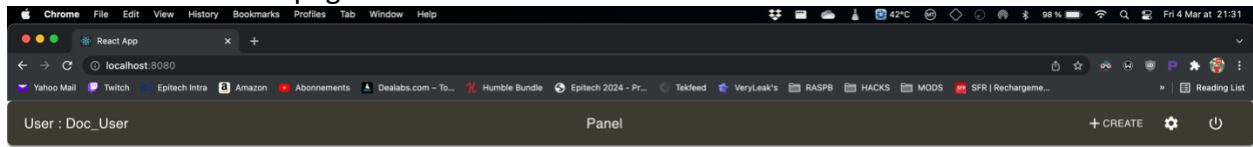

You can choose to create a widget OR to login to Spotify or Reddit, to have access to more Services:
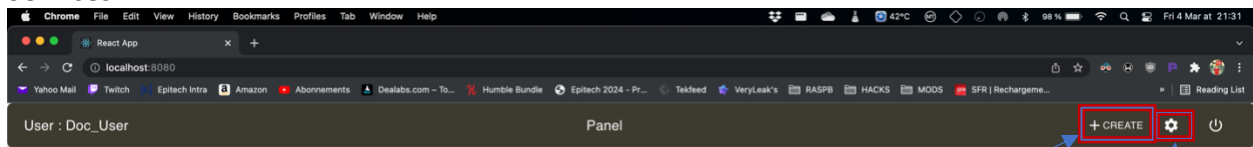

If you click on this button, you can create a widget

If you click on this button, you can access the settings to connect to the different services.

If you click on "⚙", you will be able to have access to the settings, they will give you access to 2 additional reactions.
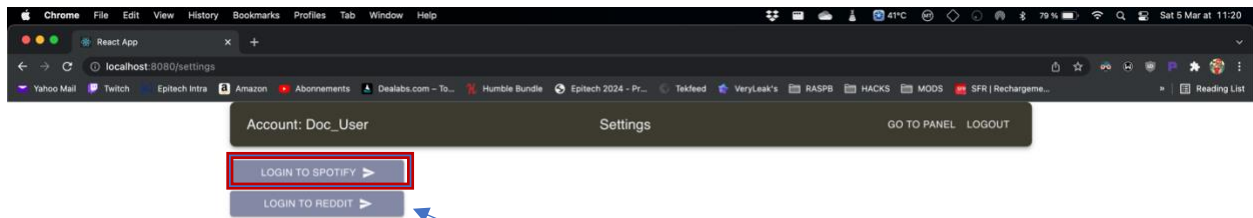

If you click on one of these buttons, you will have to login, I will try to log in on my Spotify account.

You will have to log in to your Spotify account:
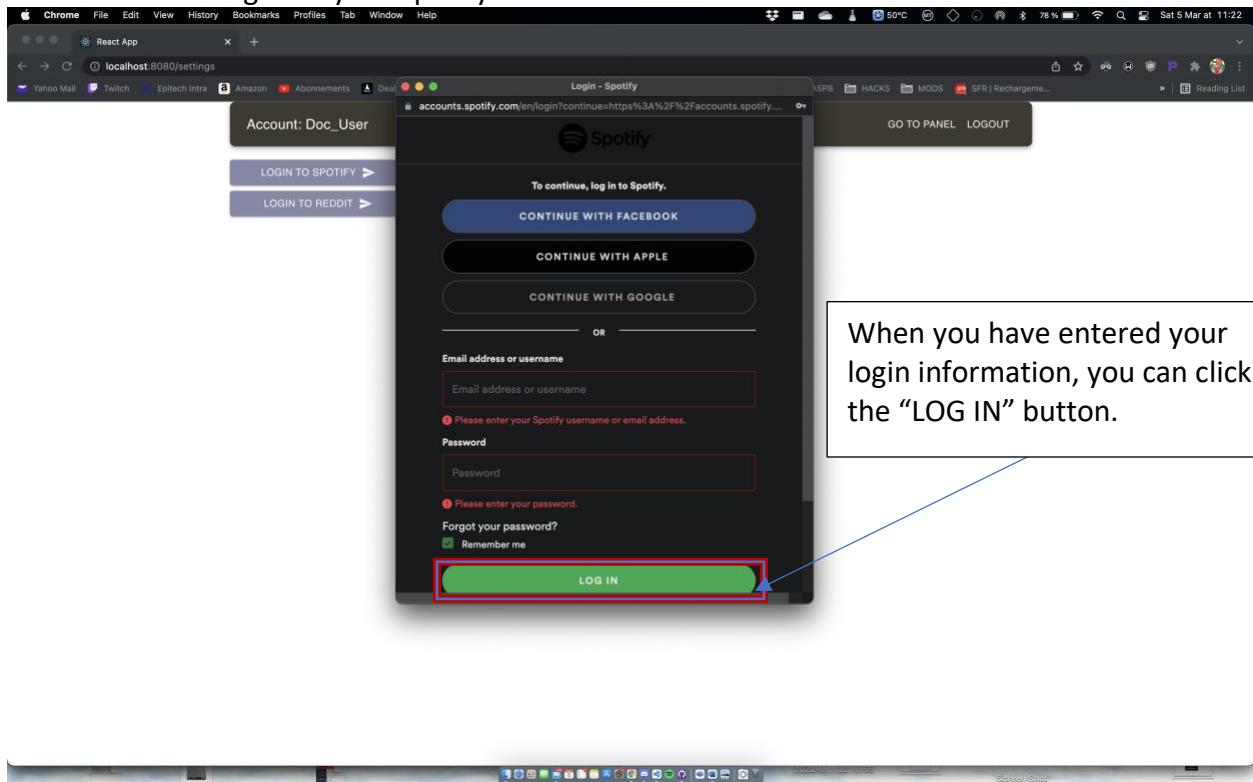

When you have entered your login information, you can click the "LOG IN" button.

You can click on the "AGREE" button to give us permission to have access to different information to make our reaction working.

Click here, to agree that you give us access to certain information about your account.
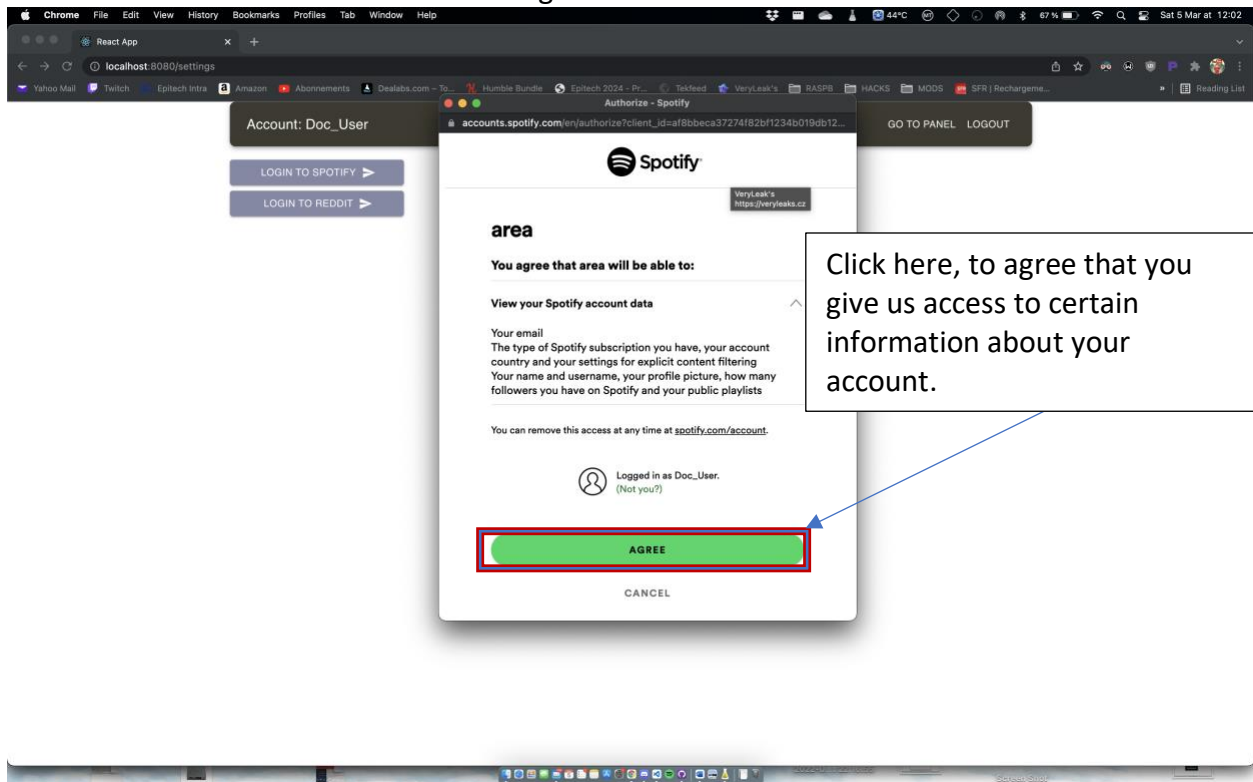

If everything went well, here is what it should look like:

Now click on the button "LOGIN TO REDDIT", if you have an account, to be able to create reaction with Reddit.
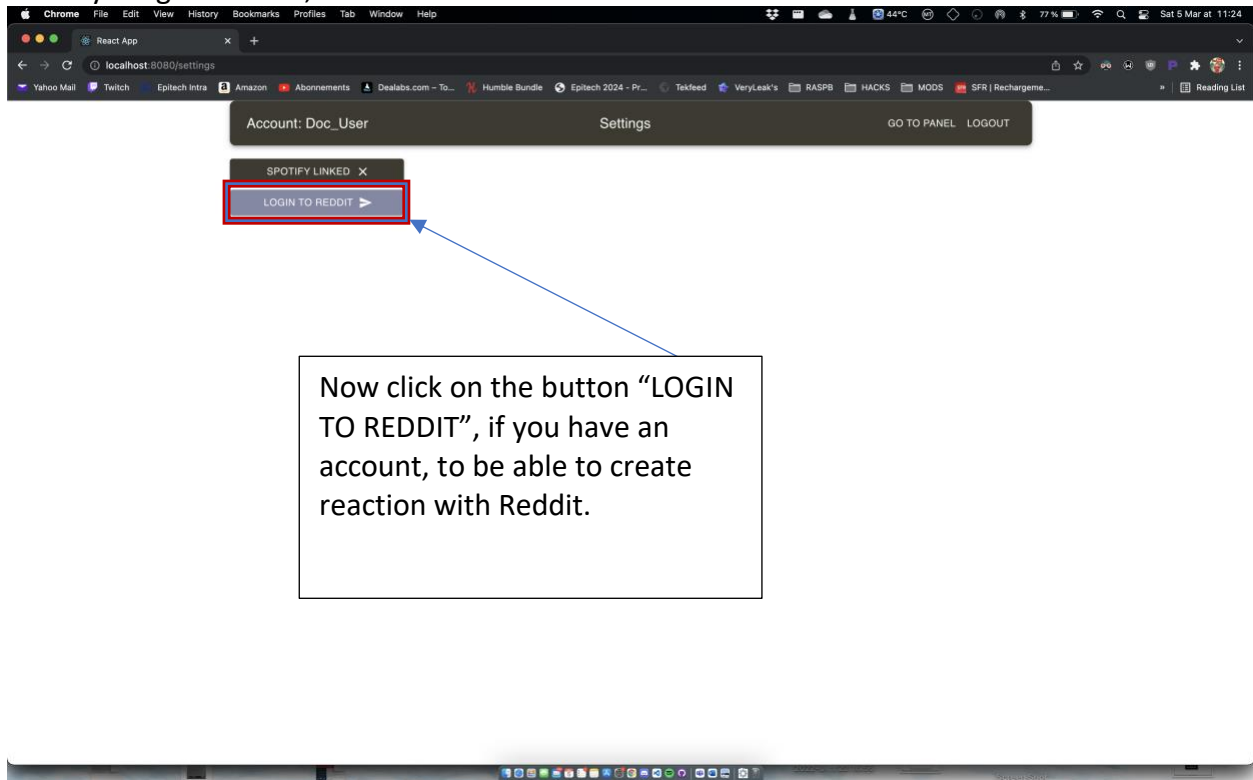

After you have clicked on "LOGIN TO REDDIT", you will have a new window open to login to Reddit:

When you have entered your login information, you can click the "LOG IN" button.

Here, you can see everything we will have access to. If you agree with that. You can click Allow. If you, don't you can click Decline but you will some reactions.
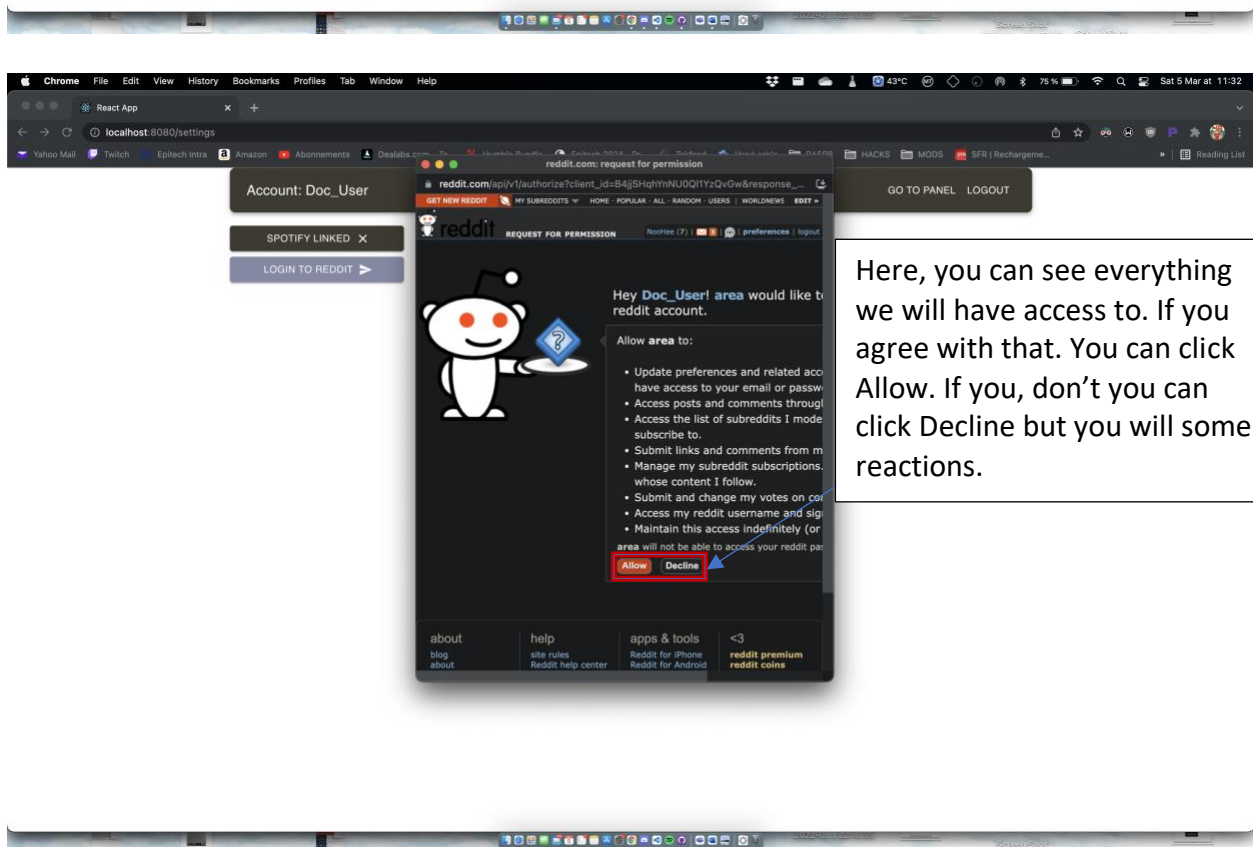

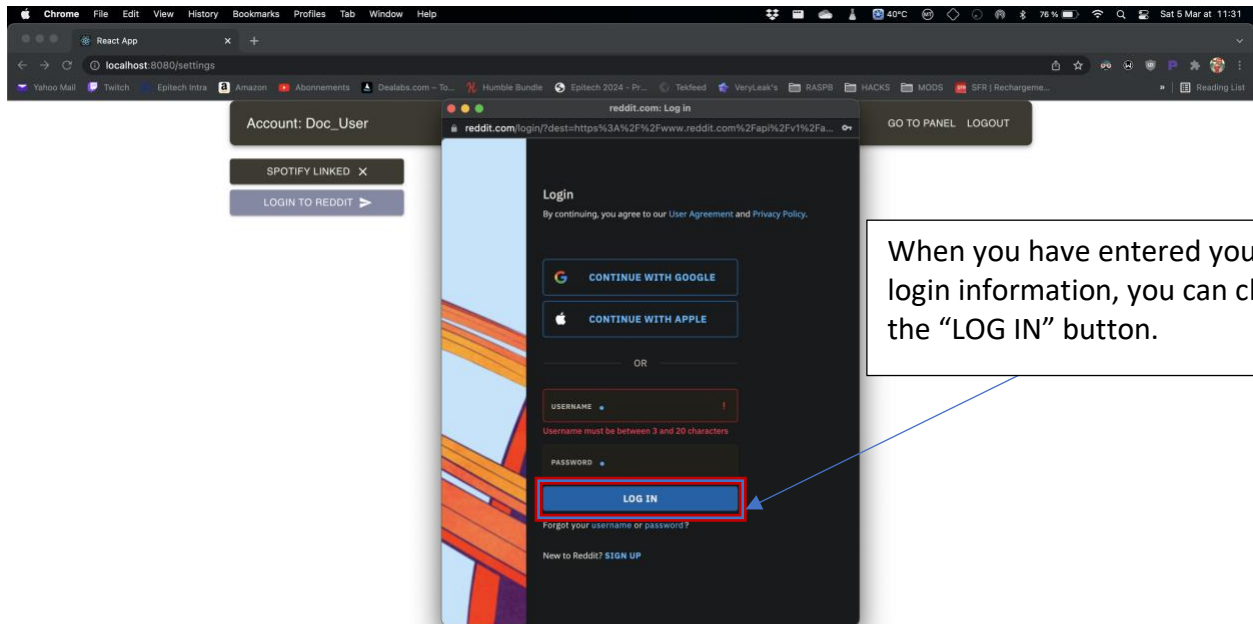

If you click on "+ Create" you will have access to the widget creation:

After clicking on the "+ CREATE" a window will open.
The first "+" button will give you access to different services which will give access to different options.
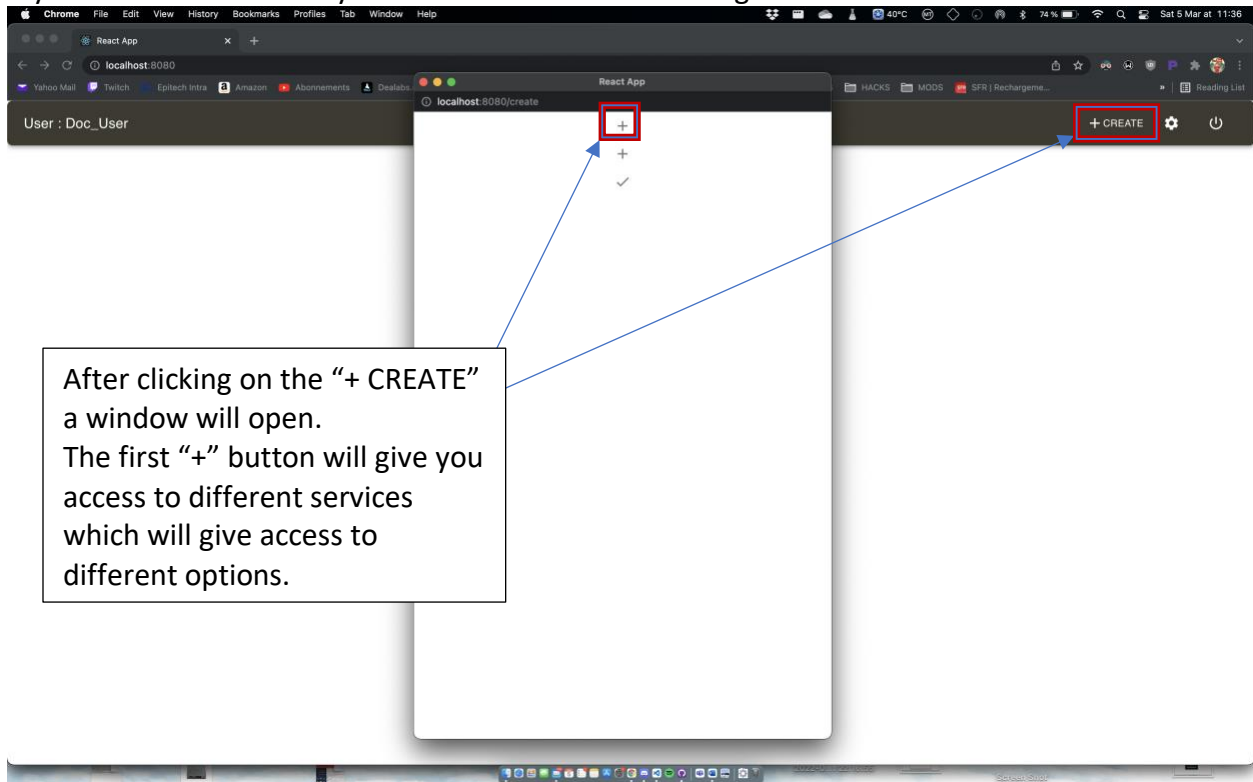

You can scroll to find different services, like Twitch, Spotify, or Reddit (if you have linked your account.).

For example, here is a service you can select, for this tutorial, I will select "Time" by clicking on it.
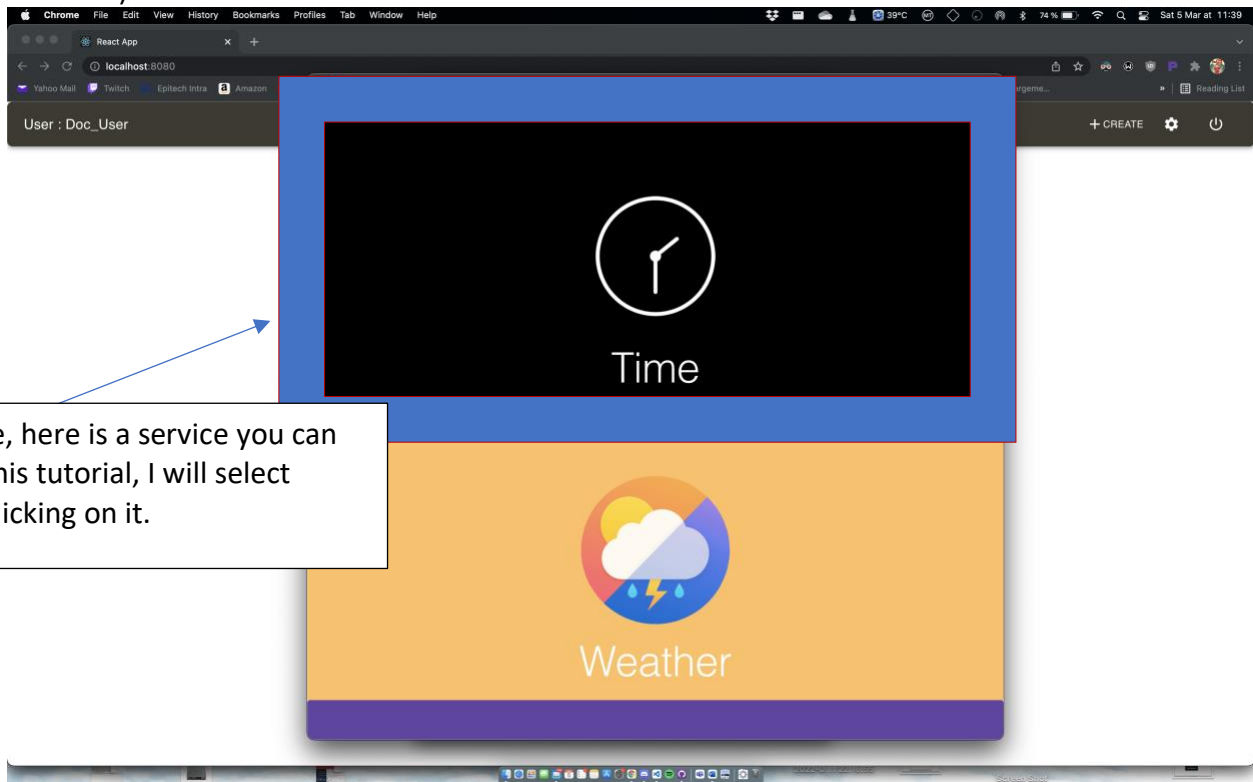

After having clicked on Time, you can choose between 2 options, sometimes you can have one choice.

You can choose between different options, I will select "Time reaching 0mins" by clicking on it. It means every time it reaches h:00, it will trigger.
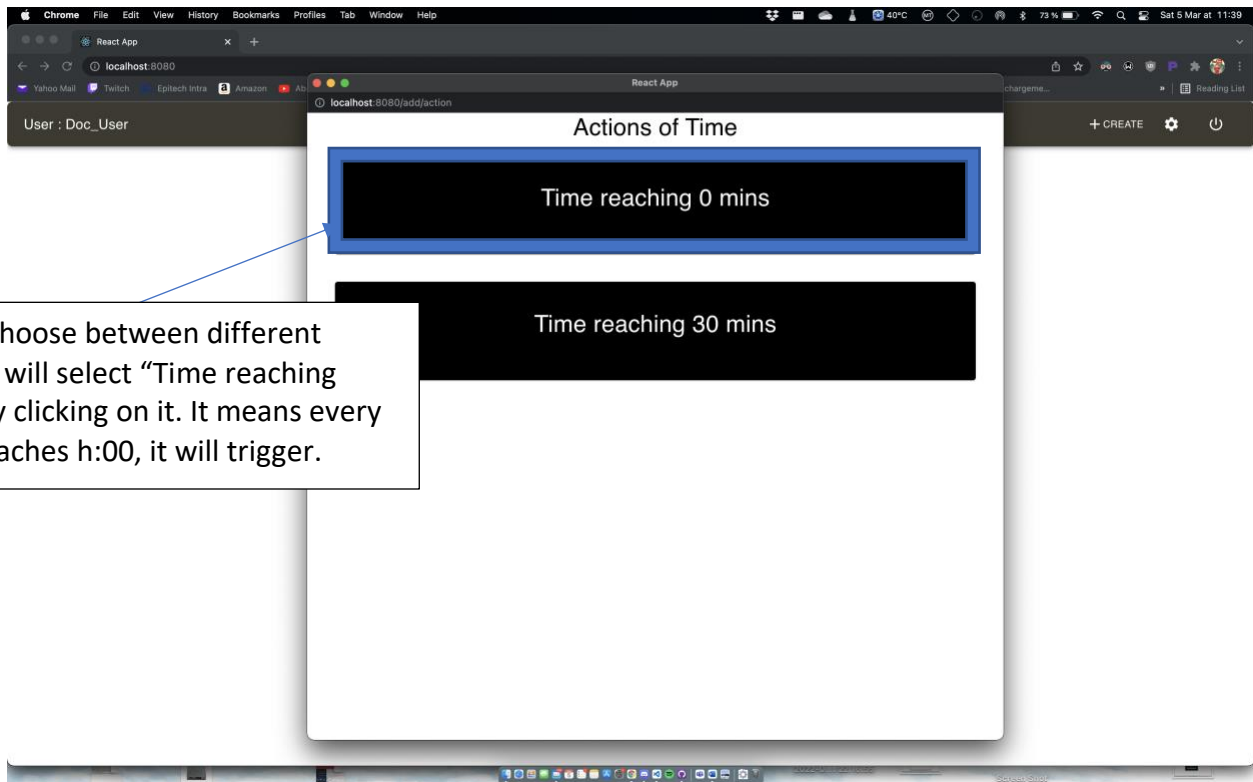

By clicking the option, it returned you to the create widget:

The second "+" button will give you access to different services which will give access to different options. ((MODIF))
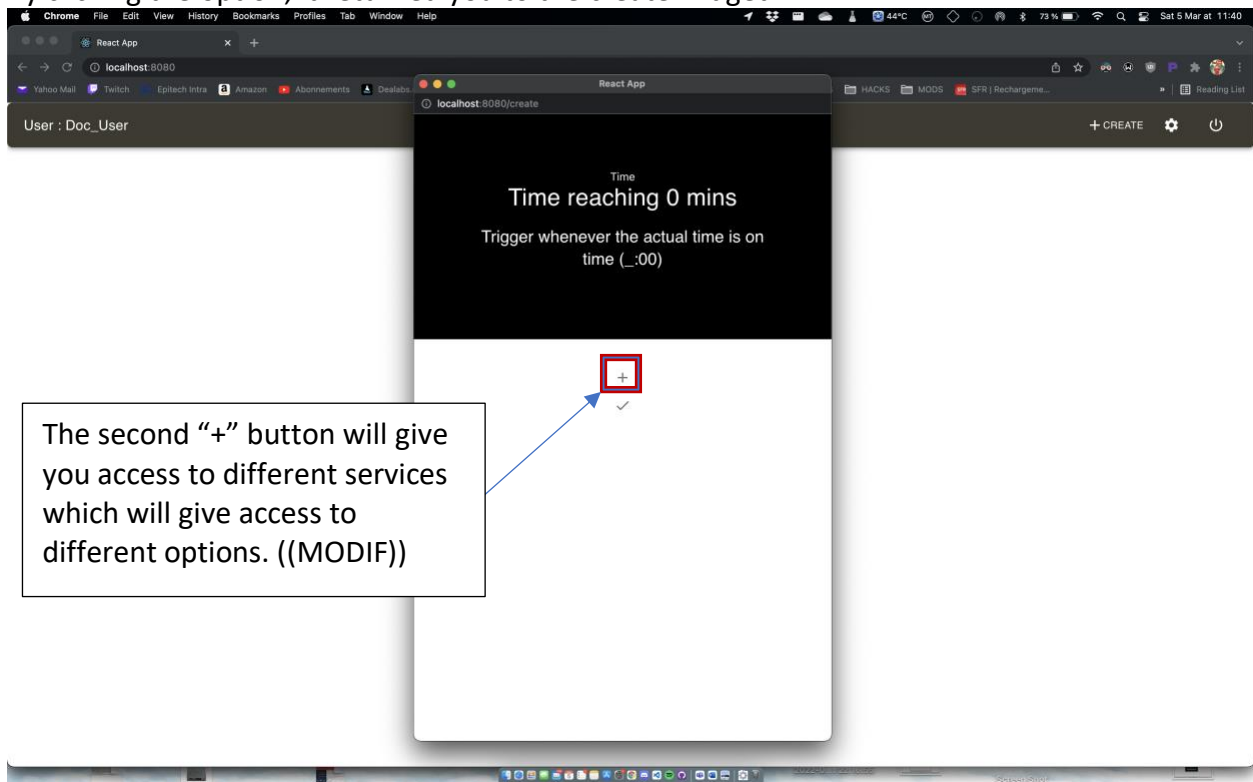

After clicking the "+" button, you will have this window to open, which will

Here you can choose the reaction which will be trigger when, for this example, the time hit h:00.
I will select the Cocktail service by clicking on it.

I will select the reaction of the Cocktail to be "Cocktail without alcohol" by clicking on it.
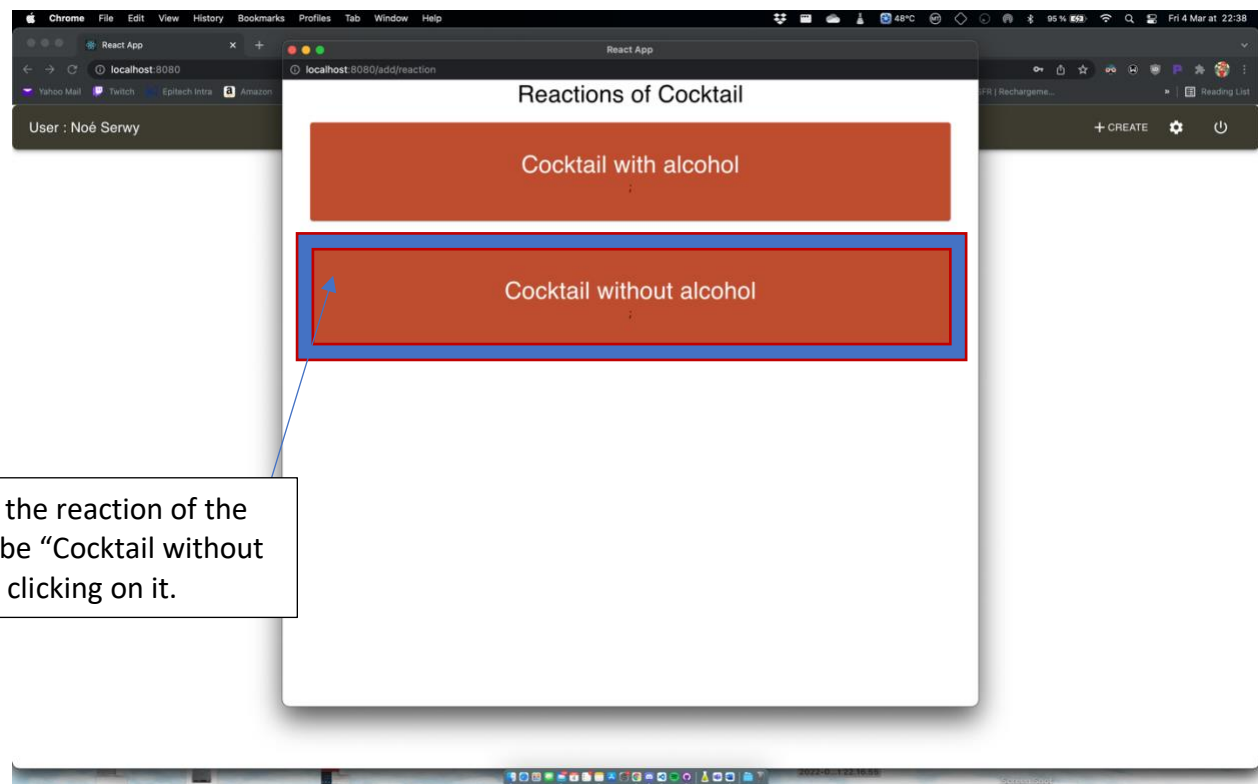

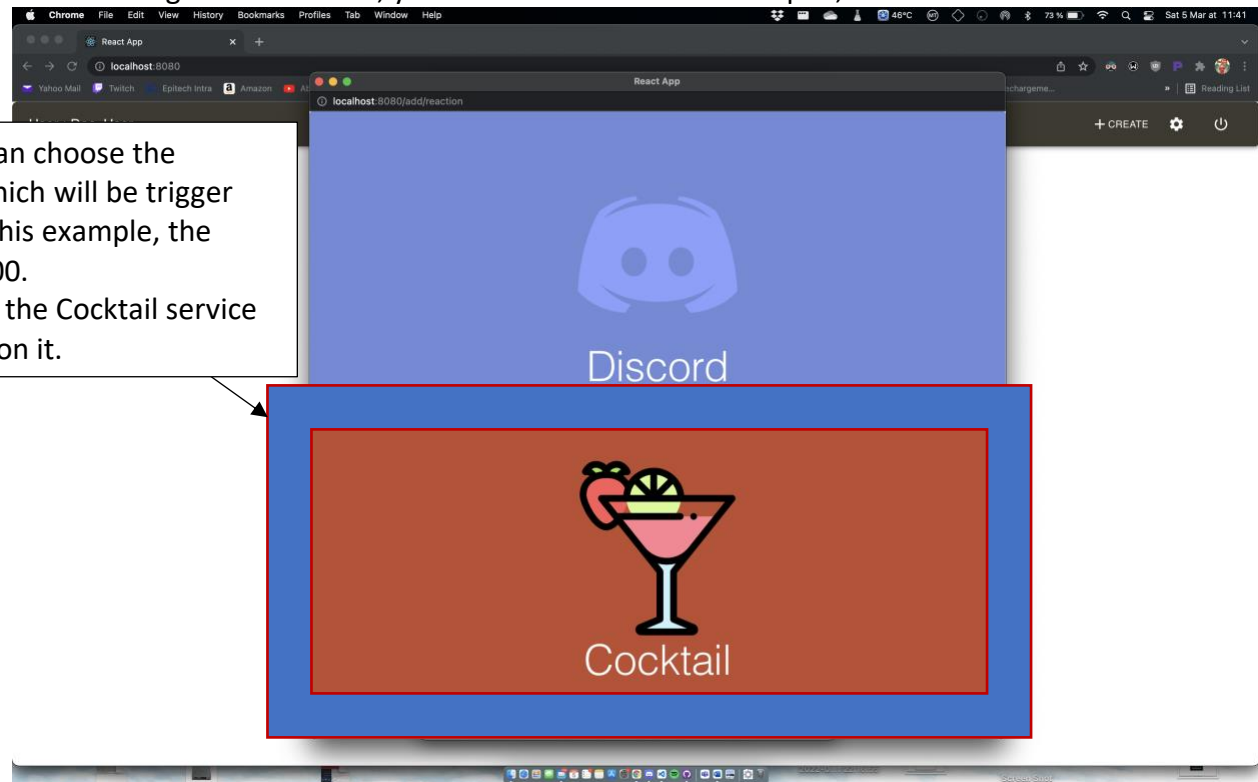

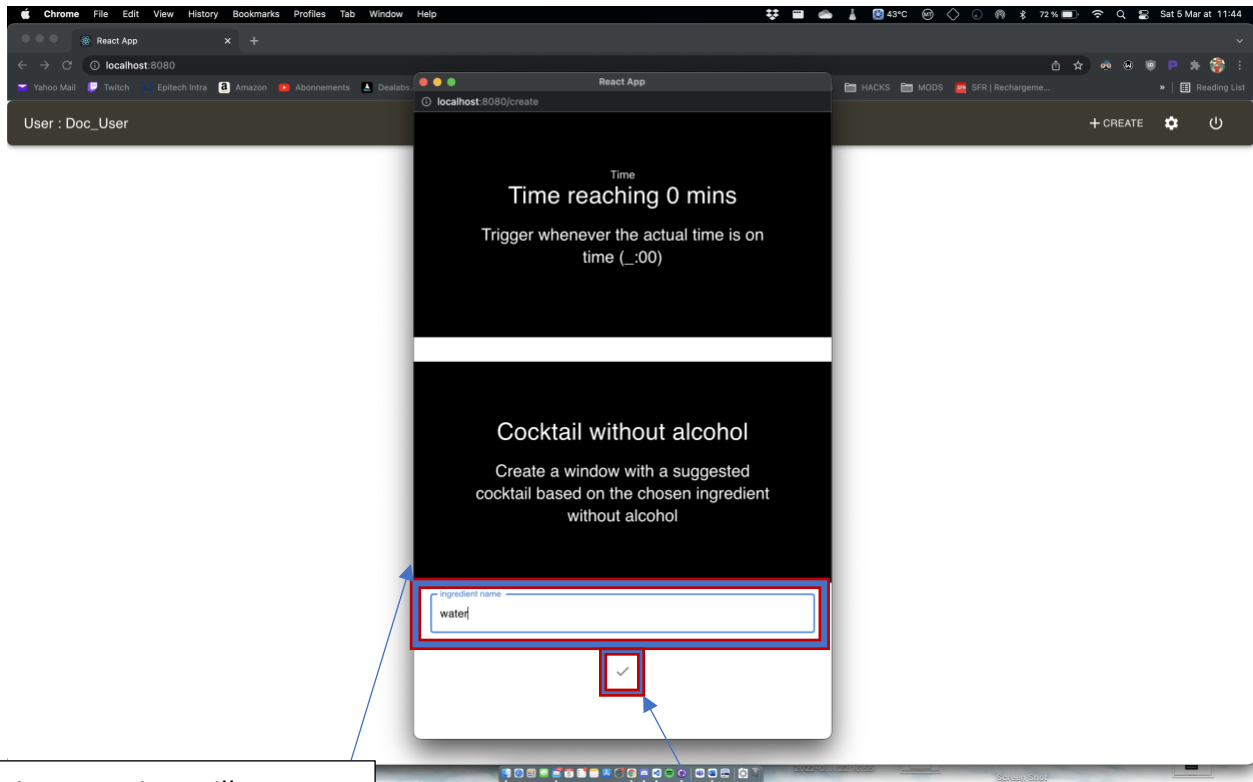

Sometimes service, will request argument to works. For this example, I will need to add an ingredient name for my cocktail without alcohol, I will click on the box that said, "ingredient name" and write "water".

When I am finished with my widget, I will click on the check mark button.

When you validate your widget, you will be sent to your home page again with a newly created widget:

IF: ON TIME

THEN COCKTAIL WITHOUT ALCOHOL

water

DELETE

This button will activate or deactivate the widget, for example, when the time hit h:00
The reaction will be triggered. If you click again, you will be able to deactivate the widget.

This button will delete the widget and the page will reload.

Now you can create Widget with your own preference!
Now that you know how to use our application.

Mobile

Now that we know, you will arrive on the login page,
If you have created your account on the web, you do not need to fill the username box and click on the Login button. But if you haven't created one, you can fill the username box and click on Register. OR you can choose to connect to your Google account it's simple just click on it, enter your information ((COMPLETE))

Login with google

Here you can choose to create one of your widgets, here this I'm using the same account as the web, I still have the widget I have created before.

IF: On Time

THEN: Cocktail without alcohol

water

To create a widget, simply click on the "+" button

6:05

IF: On Time

THEN: Cocktail without alcohol
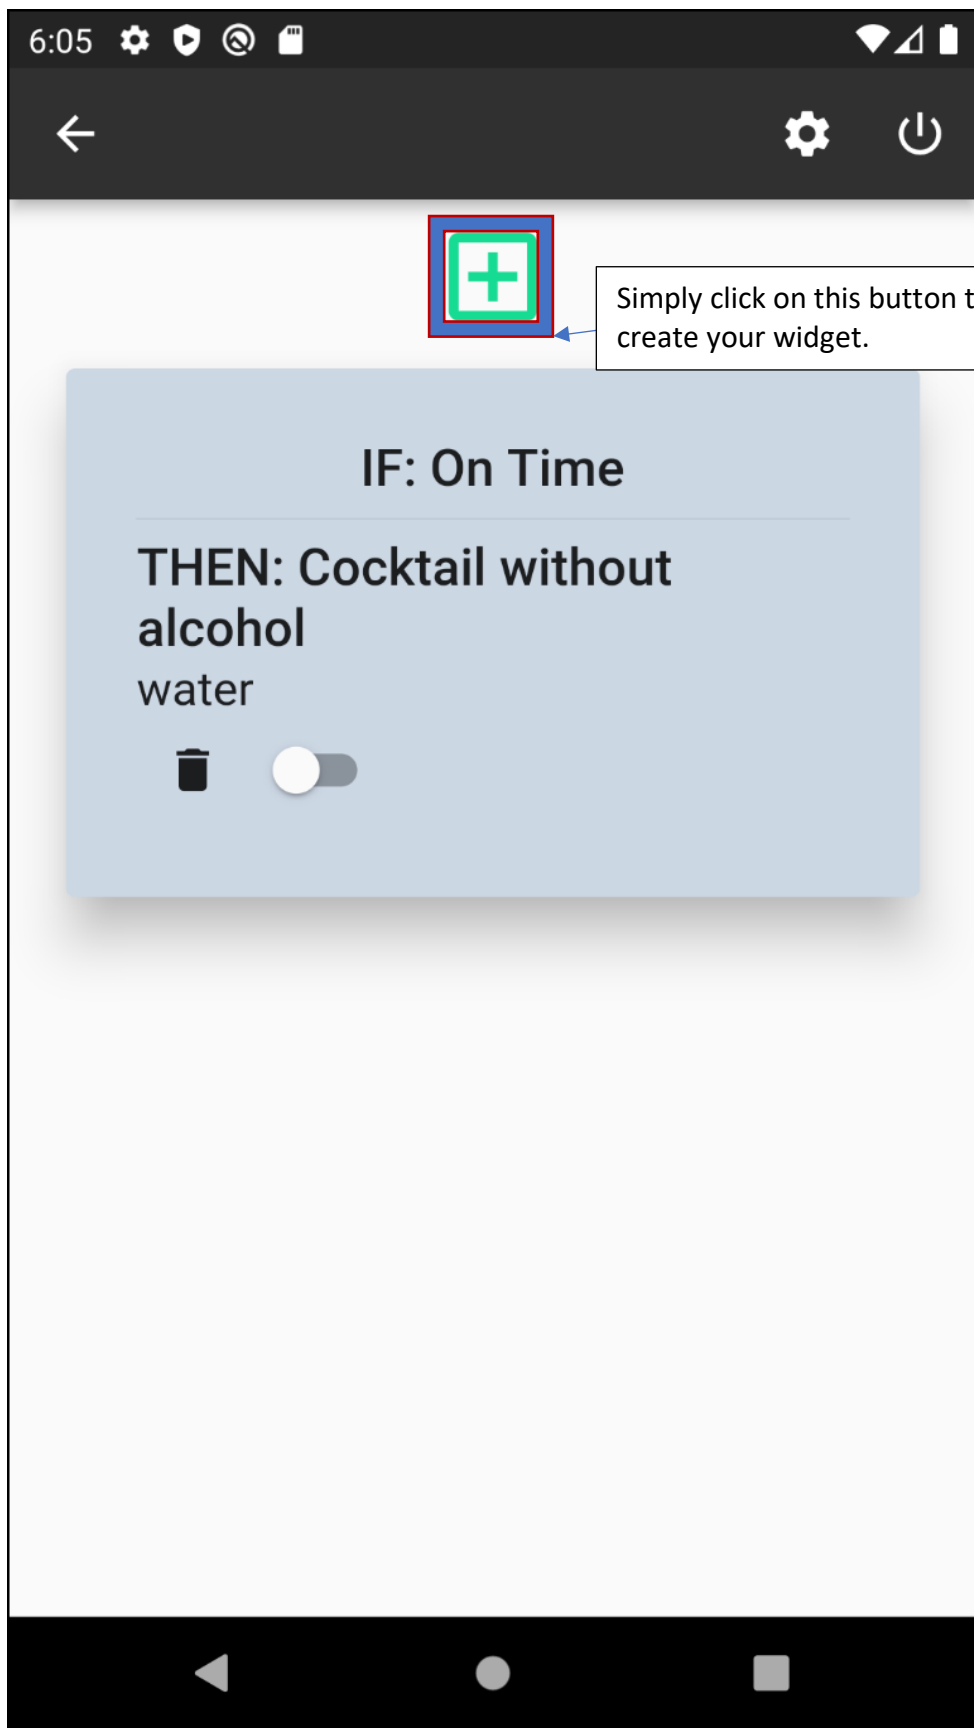

water

Simply click on this button to create your widget.

Select Action

Time

You can scroll down to view other services, we can use weather for this tutorial.
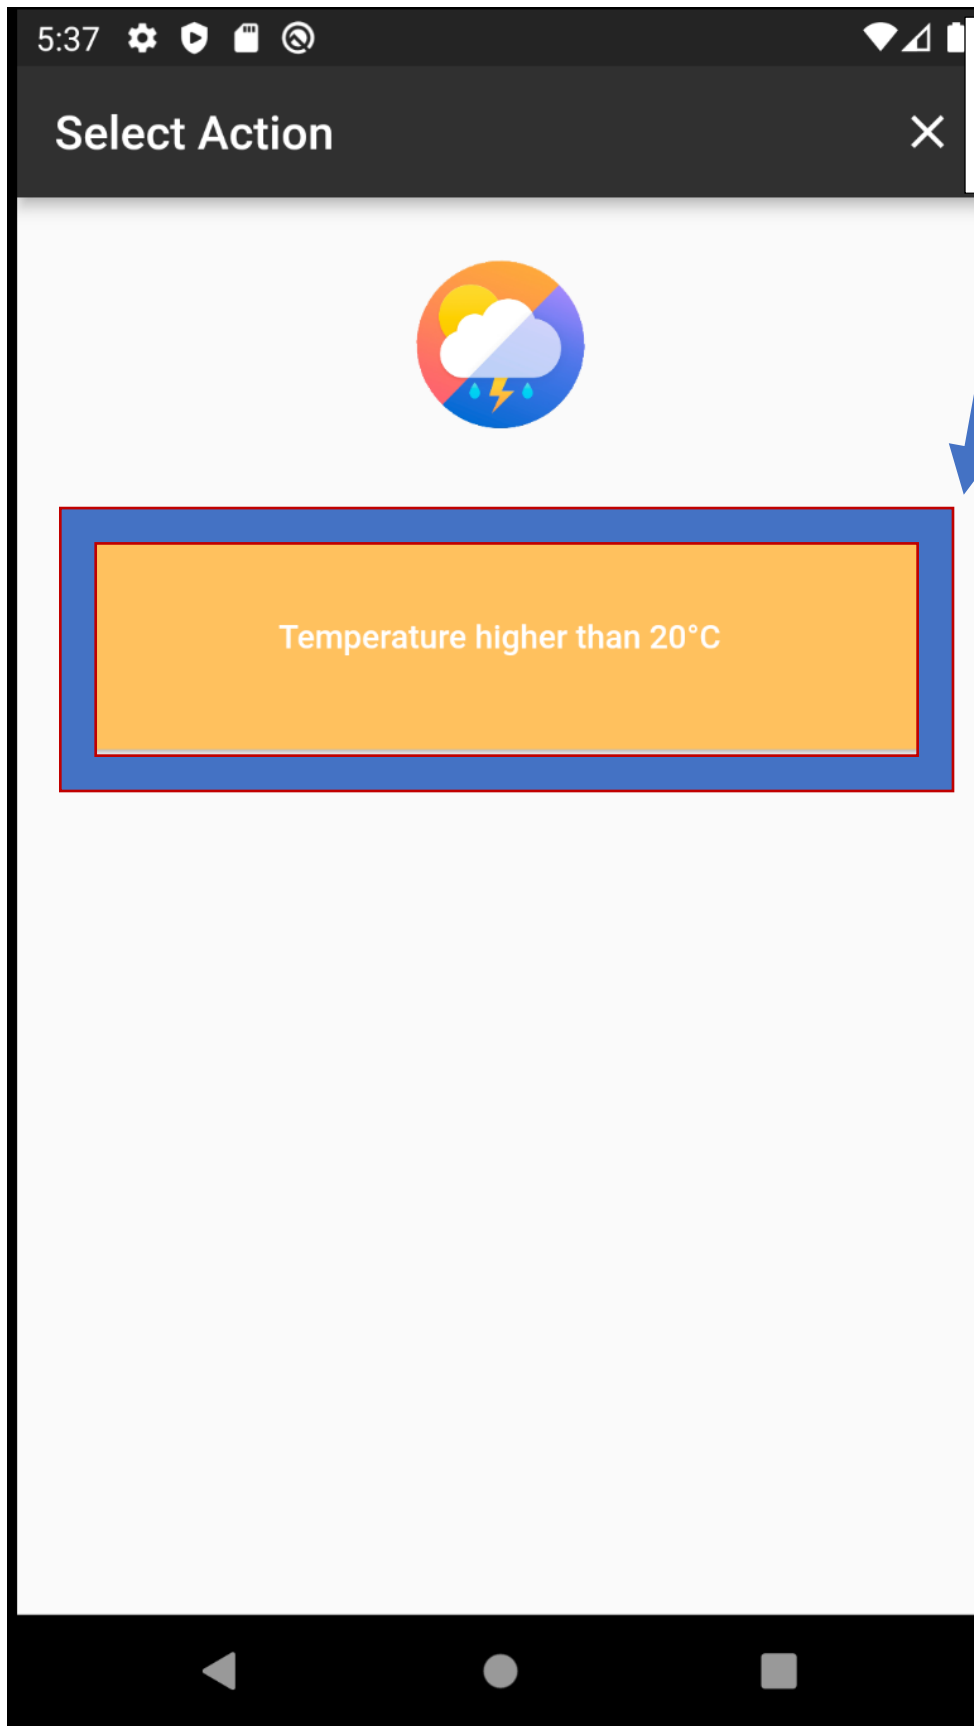

5:37

Select Action ✕

Temperature higher than 20°C

Now you can select your reaction that will occur when the city you have chosen reached or has more than 20°.

5:41

Select Reaction   ✕

Discord

For this example, I will choose
the cocktail service. Click on it!

Now we have to possibilities to choose from. I will choose without alcohol by clicking on it.

5:47

Comfirm the creation

Temperature higher than 20°C
Trigger whenever the temperature of the city is higher than 2

City name

Cocktail without alcohol
Create a window with a suggested cocktail based on the chosen
ingredient without alcohol

Ingredient name

Are you sure ?

Yes   No   Abort

Now we can fill the action and reaction we have chosen.
The first one is the city you wished to know when she reached 20°C or has already reached it.

Here you can choose the ingredient you wished to have on your cocktail. For example, water.

Here you can choose, if you want to continue with your creation, by pressing the green button "Yes" or "No" will bring you to the beginning of the widget creation. "Abort" will bring you to the main menu with your widgets.

5:53

IF: On Time

THEN: Cocktail without alcohol
water

IF: Temperature >= 20°C
Lille

THEN: Cocktail without alcohol
Water
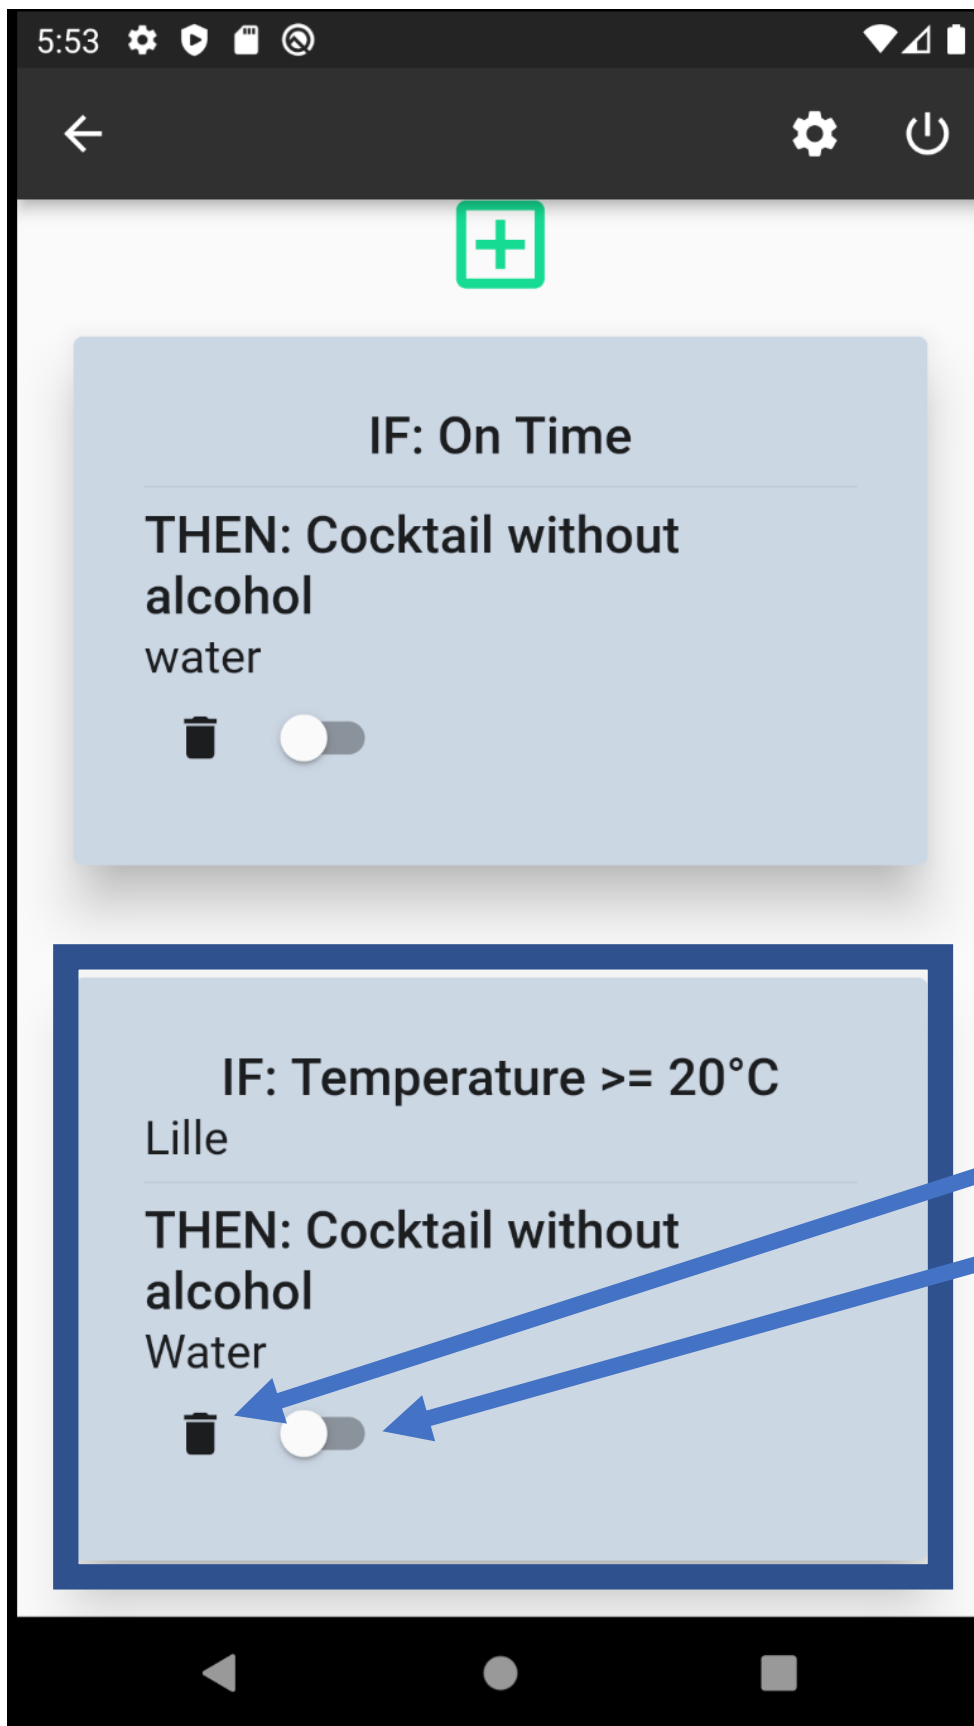

And voila, your newly widget created from scratch.

You can choose to delete it by clicking on the trash icon.

Or to toggle it on by clicking on the switch.
